**HOMEFRONT SOFTWARE™ ANNOUNCES ITS NEWEST CAPABILITY –
INTEGRATION WITH SAGE MASTER BUILDER**

Calgary, Canada – June 17, 2008. HomeFront Software™, a leading home builder management software system, today announced that it now integrates with Sage Master Builder. This integration provides a complete home builder management solution that is simple, flexible, and cost effective for builders of all sizes. In the past, these systems have only been adopted by larger production builders. Now, with HomeFront's integration with Sage Master Builder, smaller builders can afford one complete system to manage their entire building process.

“It is very exciting to finally be able to offer a single management solution to the smaller builders that so far have had to use multiple systems to complete their projects, forcing them to make costly, unnecessary mistakes,” said Daryl Shenner CEO, HomeFront Software. “HomeFront Software develops its products by listening to builders and learning what they need to stay ahead in this difficult economy. Our interest in integrating with Sage Master Builder stemmed from learning that there was no single, cost effective solution adequately meeting the needs of custom and semi-custom home builders.”

HomeFront Software requires no third party integration, therefore all double entry and manual mistakes are eliminated. This solution is a perfect fit for builders who build between 5 – 300 homes per year. With HomeFront, Sage Master Builder users now have the unique ability to manage their sales, estimating, purchasing, scheduling and service & warranty within one management system.

ABOUT HOMEFRONT SOFTWARE

HomeFront Software, based in Calgary, Canada, is a leading home builder management solutions provider that offers a complete solution for the entire home building process from one, easy-to-use software system. HomeFront provides home builders of all sizes with the real-time information necessary to make the business decisions that will maximize profits before, during, and after construction. HomeFront is a collaborative effort of technology experts who have been working in the residential building industry for over 20 years. The company was created to provide home builders with the tools they need to manage their businesses and WIN in today's competitive residential market.
