

FOR IMMEDIATE RELEASE

ZYBERTECH CONSTRUCTION SOFTWARE SERVICES, EXCLUSIVE CANADIAN RESELLER OF HomeFront SOFTWARE, WINS TOP FINALIST POSITION IN THE 2007 SAM INDUSTRY ACHIEVEMENT AWARDS

HomeFront Software's PrecisionBuilder is Chosen as Finalist for SAM's 2007 Best Innovative Product of the Year

Alberta, Canada. May 6, 2008 – Zybertech Construction Software Services., a leading home builder management solutions provider and exclusive Canadian Reseller of HomeFront Software, wins a top finalist position in the 2007 SAM Industry Achievement Awards for HomeFront's unique home builder estimating solution, *PrecisionBuilder*.

PrecisionBuilder was chosen because of its ability to empower the home builder with a fast and efficient way to build model and option price books utilizing a built-in take-off tool or directly from Excel spreadsheets. With *PrecisionBuilder*, prices can be based on markup, margin, and/or market prices and immediately published to sales centers. Also, with *PrecisionBuilder*, budgets and purchase orders are generated from selections based on templates or real time take-offs for custom options.

"*PrecisionBuilder* is an important solution for home builders of all sizes," said Daryl Shenner, CEO of Zybertech Construction and HomeFront Software. "Many building products are tailored to the larger production builder, but they do not respond to the custom and semi-custom builder's need to make changes. HomeFront Software has eliminated this problem completely."

PrecisionBuilder is the final piece to complete the award winning HomeFront Home Builder Management Tool Kit, which offers home builders the first single software solution, giving a complete, real-time picture of the entire home building process. Because HomeFront Software can be directly integrated with a builder's accounting system, it provides builders access to vital information necessary to make accurate and intelligent business decisions before, during, and after construction.

HomeFront Software is currently managing over 30% of home builders in Alberta and is quickly becoming a top choice for home builder management solutions across Canada and the U.S.

ABOUT ZYBERTECH CONSTRUCTION SOFTWARE SERVICES.
